

Intensive cleaner for garden furniture and terraces

Characteristics

Floorservice Woodwash cleans thoroughly and removes greying from soft and hard woods.

Applications

Garden furniture produced from soft or hard wood and greyed timber terraces.

Contents

Oxalic acid.

Technical data

Form: Fluid.

Odour: Characteristic.

Boiling point: 101°C.

Self-igniting: Product is not self igniting.

Danger of explosion: Product does not represent an explosion hazard.

Density at 20°C: 1,048 g/cm³.

Solubility in water: Fully miscible.

Solvent content: Organic solvents: 0%

Solids content: 9,6%

Packing: 1 liter

Instructions for use

Shake before use.

Apply a thin layer to the wood with a brush or cloth. Do not use in direct sunlight because the de-greyer will dry too quickly. In warm conditions first wet the wood with water. Allow the de-greyer to be absorbed for approximately 15 minutes to one hour (depending on the degree of greying). Rub the wood with a brush or abrasive sponge with a little water. Rinse thoroughly with water in order to neutralize the wood and remove the dirt, and then allow the wood to dry for 1-2 days. After this treatment the wood is rough and leached. Lightly sand the surface and recoat with Floorservice products, e.g. garden furniture or terrace oil.

Above product information and recommendations are given in good faith and based on practical tests following long term research and development. We cannot assume responsibility for any work as the ultimate results depend on factors beyond our direct control. In cases of doubt always test the product in advance.
